where he might be seen by a prospective

The stableman took he horse to the

The next morning, when the stable was opened, the borse was found to have eight bad euts on his forelegs. He had been slashed with a sharp knife.

When Mr. Dillon went into the stable
When Mr. Dillon went into the stable When Mr. Dillon went into the stable yesterday morning he found blood flowing in streams from the mouth of Smith's horse. There was a great pool of blood in the stall. Dillon opened the horse's mouth and found that over two inches of the poor beasts tongine had been cut off. The Society was notified and Gabely was arrested.

That nothing more than revenge was the object of the man who cut the horse is evident from the fact that nothing clse in the stable had been touched. A window in the rear had been forced open and through this an entrance was gained.
